

**SUDAMA
HEALTH**

**Nurse-led telemedicine
clinics providing access to
affordable and quality
primary healthcare for
everyone.**

1 year, 2 clinics live.

5000+ patients served.

Bengaluru Rural.

The Urban-Rural Healthcare Divide

**~ 60% of patients
live outside urban
centers.**

**~ 80% of doctors
practice in urban
centers.**

70% of healthcare spending is out-of-pocket.

Travel Distance

> 20km

Consultations

> ₹500

Diagnostics

> ₹1000

Medicines

> ₹500

Nurse using digital stethoscope for remote auscultation.

Technology + lean operations for affordable and quality healthcare access.

Strong USPs

Durable Moats

On-site nurses provide inputs and operate connected diagnostic equipment for a comprehensive remote diagnosis.

**Nurse-led
healthcare delivery**

On-site nurses build trust with patients. Requires deep operational design and training.

Doctors can see patients across multiple clinics over video thereby improving the utilization of doctors.

**Distributed,
low capex clinic network**

Local partnerships with pharmacies create lock-ins which cannot be broken easily.

Protocol driven clinical workflows deliver standardized triaging and care irrespective of location or staff.

**Protocol driven clinical
workflows**

Remote-first, rural India ready protocols shaped by months of on-ground operational experience.

Remote-first AI-augmented platform to enforce clinical workflows and reduce clerical workload.

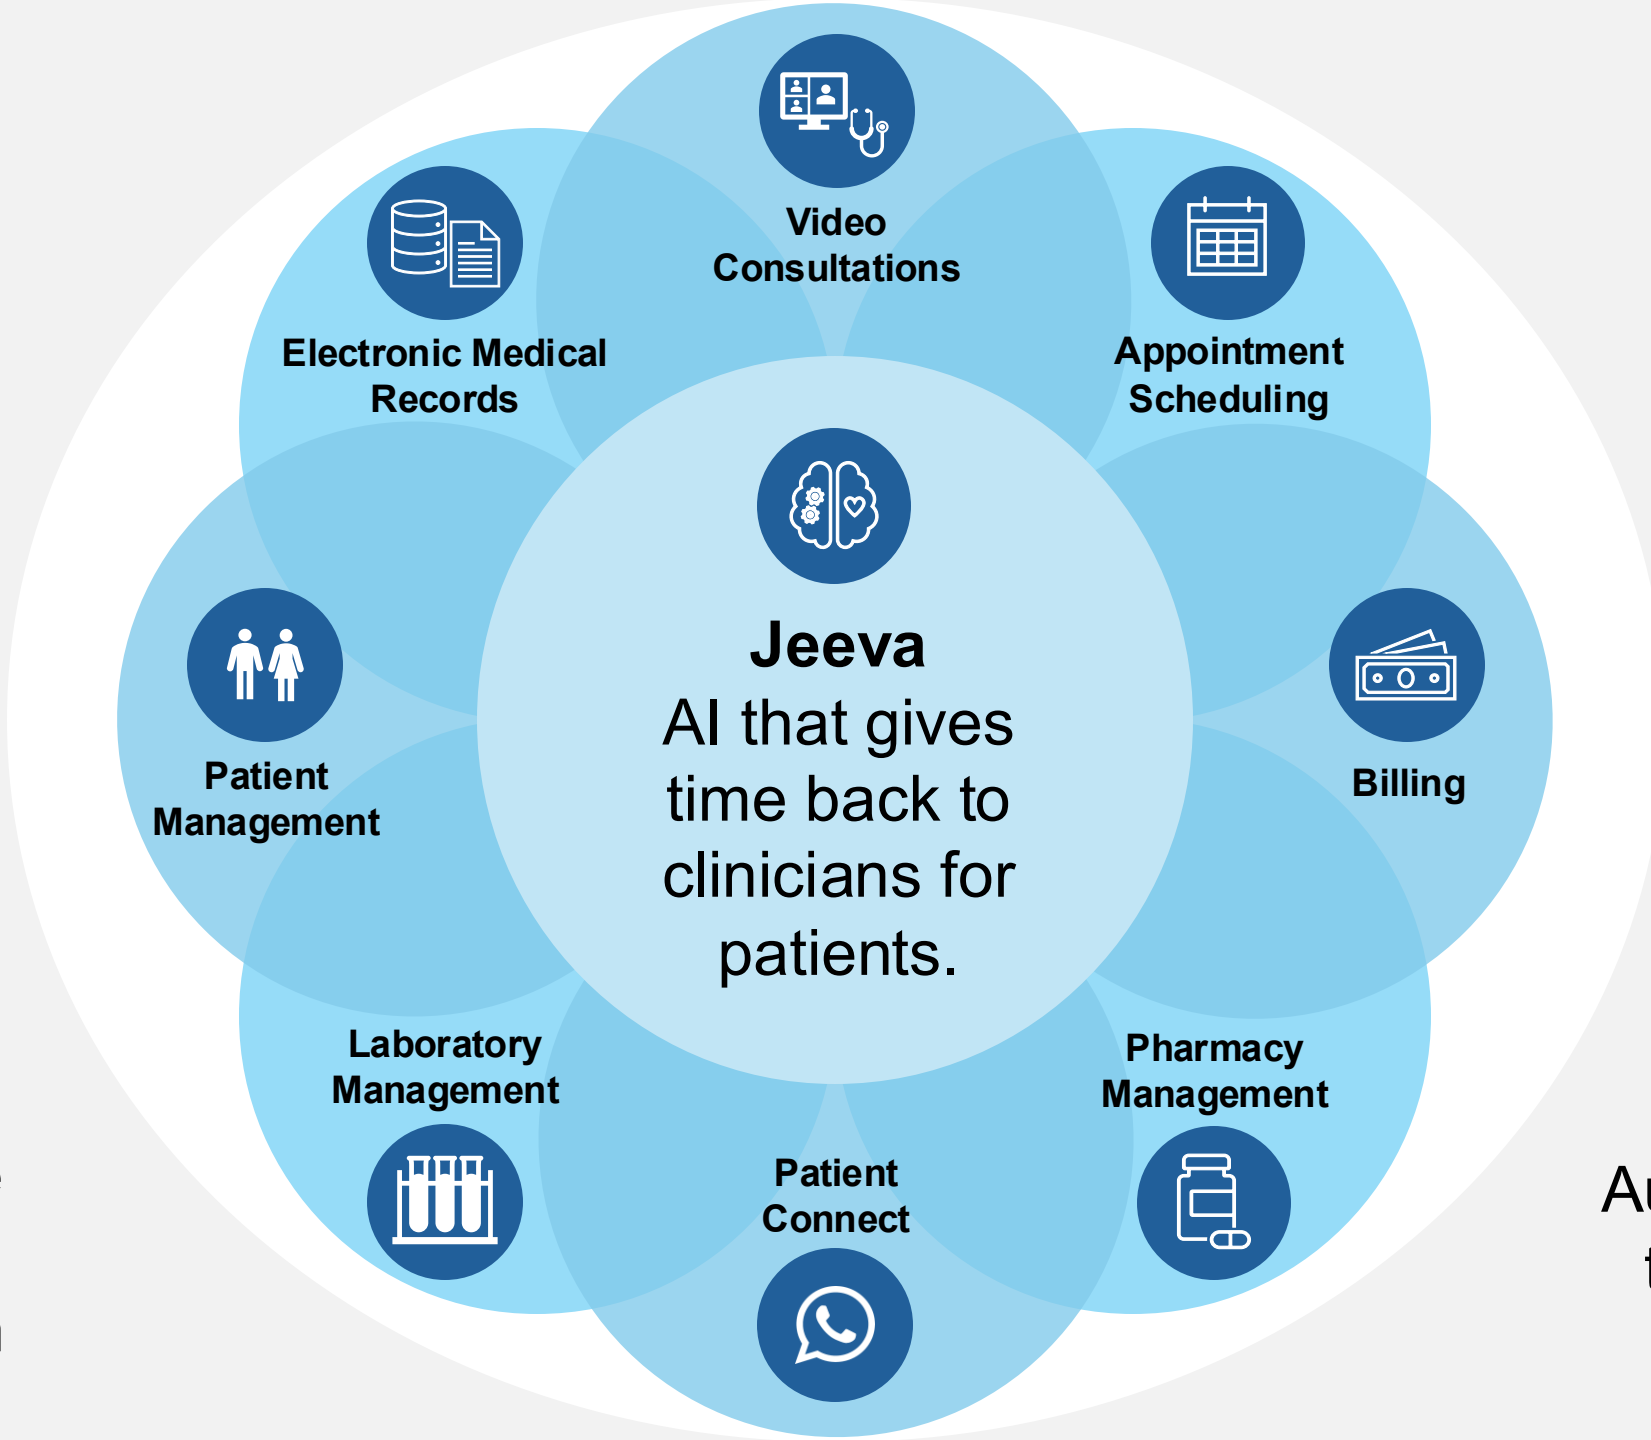

**"Jeeva"
AI-augmented
clinical management
platform**

Deep integration with on-ground operations and designed in collaboration with clinical team.

Enforces
standardized
