

**SUDAMA
HEALTH**

**Nurse-led telemedicine
clinics providing access to
affordable and quality
primary healthcare for
everyone.**

1 year, 2 clinics live.

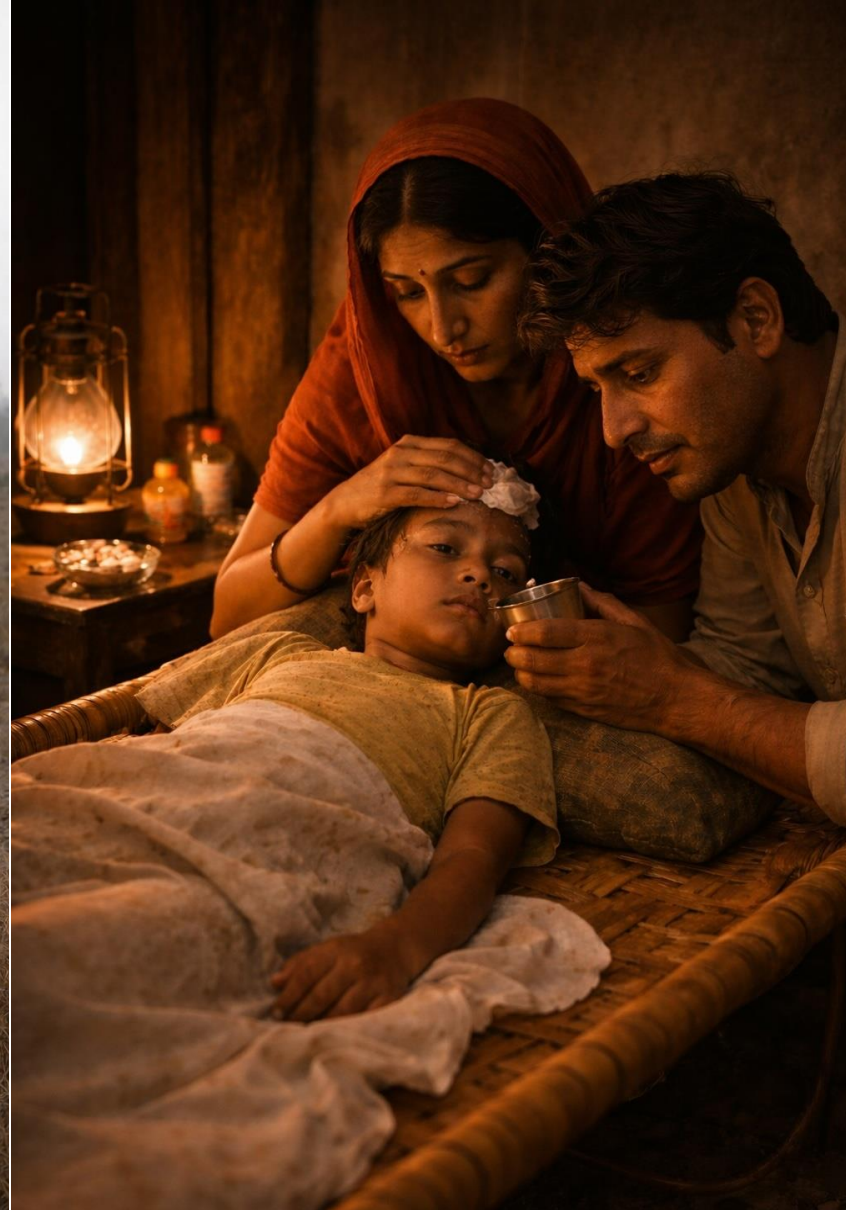

5000+ patients served.

Bengaluru Rural.

Healthcare access in rural India is broken.

Delayed treatment leads to poor outcomes.

Telemedicine clinics provide access to affordable and quality healthcare.

The Rural-Urban Healthcare Divide

**~ 60% of patients
live in rural areas.**

**~ 80% of doctors
practice in urban
areas.**

70% of healthcare spending is out-of-pocket.

Travel Distance

> 20km

Consultations

> ₹500

Diagnostics

> ₹1000

Nurse using digital stethoscope for remote auscultation.

Technology + lean operations for affordable and quality healthcare access.

Strong USPs

On-site nurses provide clinical observations and operate diagnostic equipment for a comprehensive remote diagnosis.

Doctors can see patients across multiple locations over video thereby improving the utilization of doctors.

Protocol driven clinical workflows deliver standardized care irrespective of location or staff.

Remote-first AI-augmented platform to enforce clinical workflows and reduce clerical workload.

**Nurse-led
healthcare delivery**

**Distributed,
low capex clinic network**

**Protocol driven clinical
workflows**

**"Jeeva"
AI-augmented
clinical management
platform**

Durable Moats

Superior to self-service kiosk/app model. Requires deep operational design and training.

Local partnerships with pharmacies create lock-ins which cannot be broken easily.

Remote-first, rural India ready protocols shaped by months of on-ground operational experience.

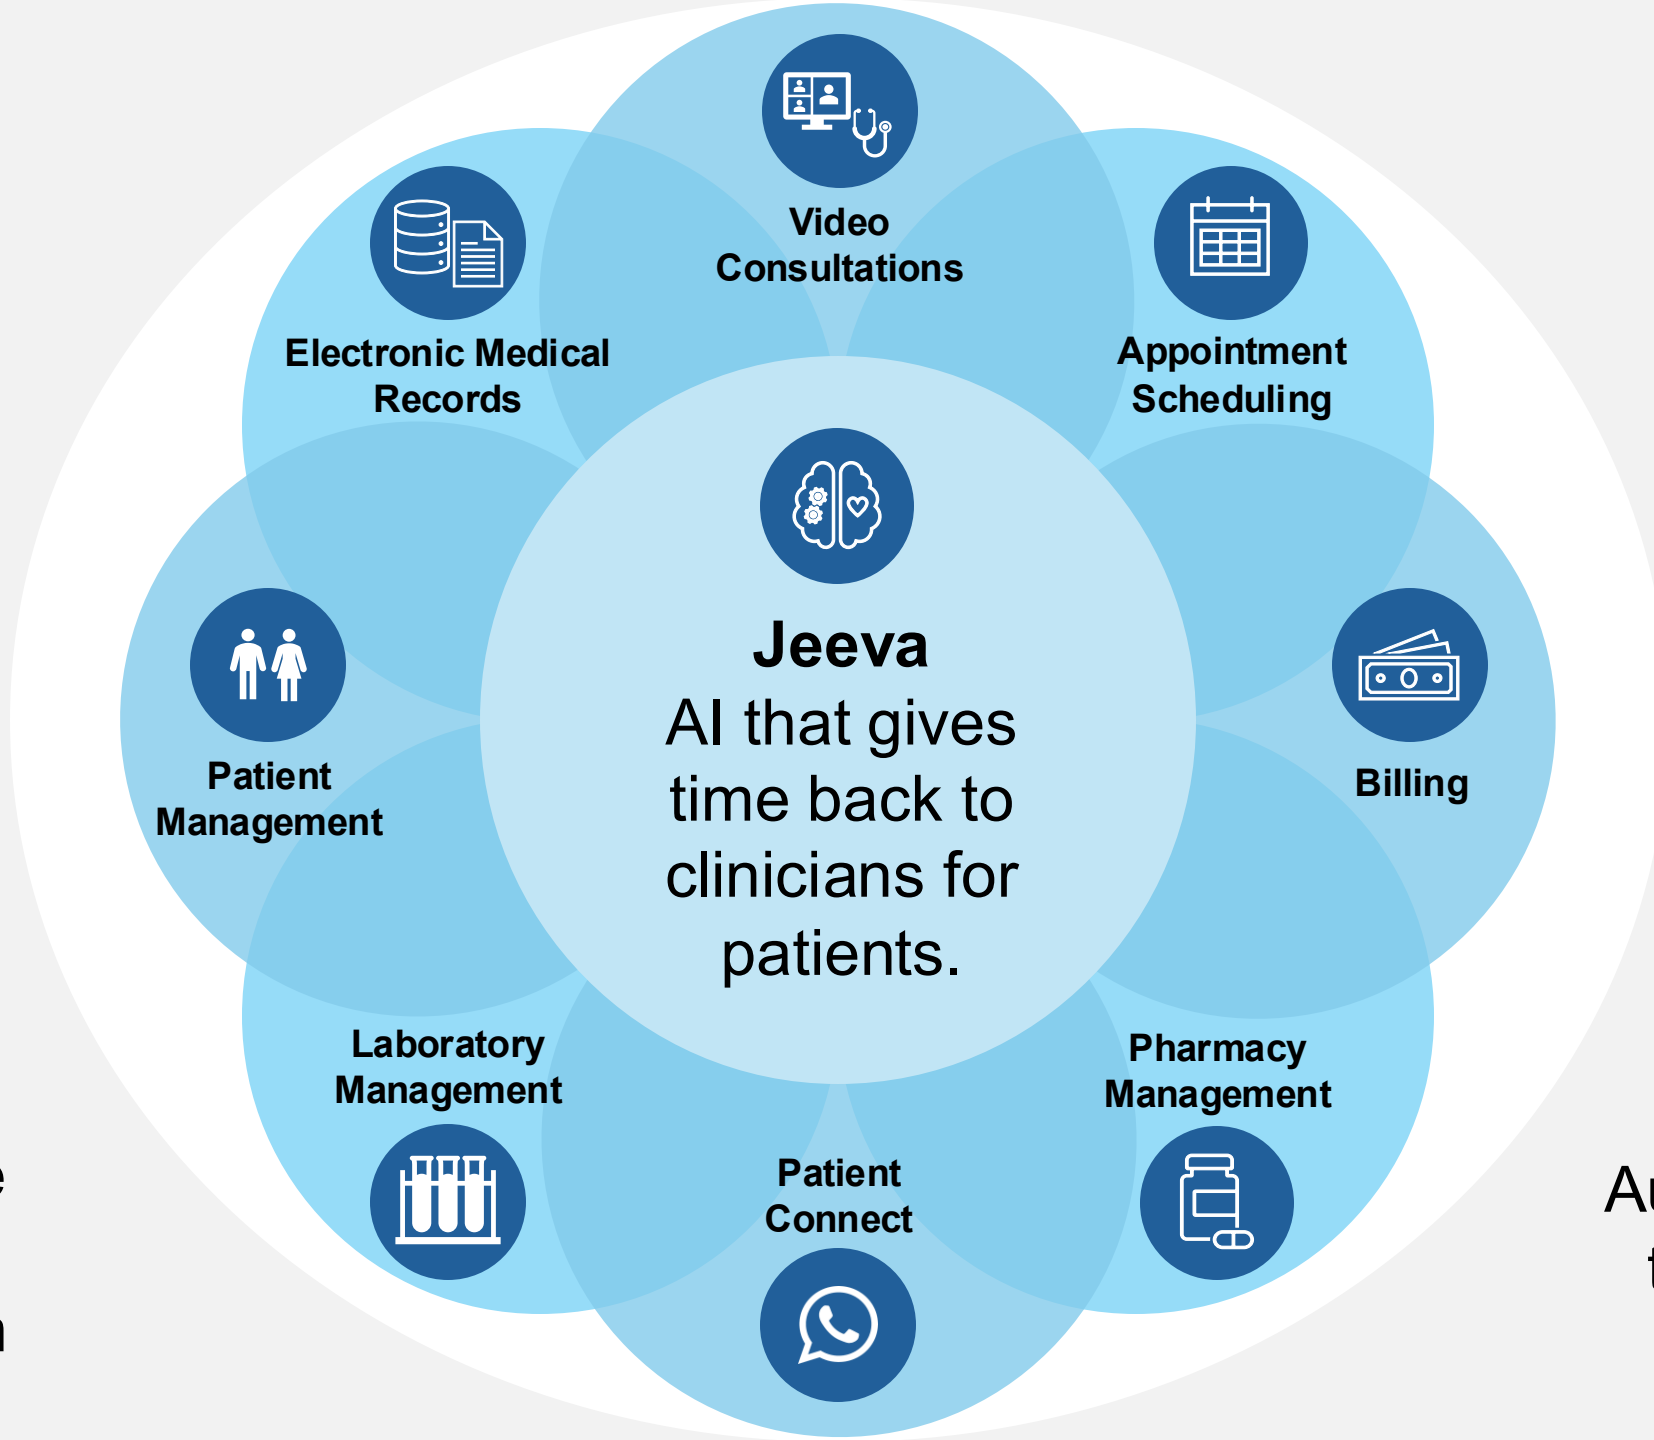

Deep integration with on-ground operations and designed in collaboration with clinical team.

Enforces
standardized
clinical
protocols

Customizable
